ILLUSTRATOR

STEP BY STEP TUTORIAL

01. Installing Requirements:

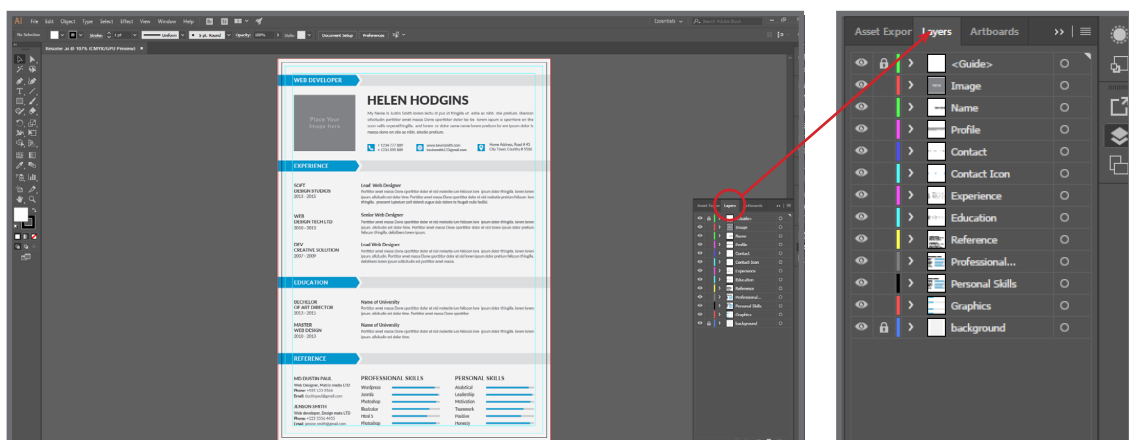

First thing first. Download and install all the **Required** things like **Fonts**, listed in the help file.

02. Open The Document:

After extracting the **Main_files.zip** file, double click on the **filename.ai** file to open the illustrator document you just purchased.

03. Turn On Layer Panel:

Press **F7** to show/hide Layer Panel.

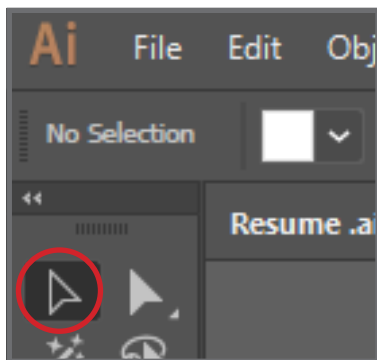

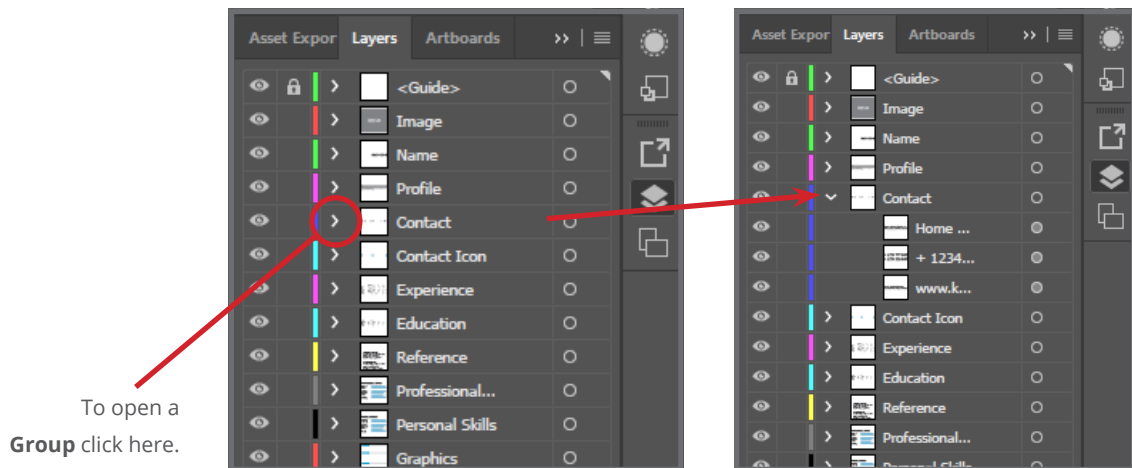

Layers are everything.

Every item is layer based.

Layer let's you **Customise** or **Edit** your purchased item.

04. Ungrouping or Opening group:

Look at the **Layer panel** to access all the layer of the item. All design section / area are **Grouped**. Press **Ctrl+Shift+G** in order to ungroup or you can just open any group to get the layer inside.

05. Move Tool:

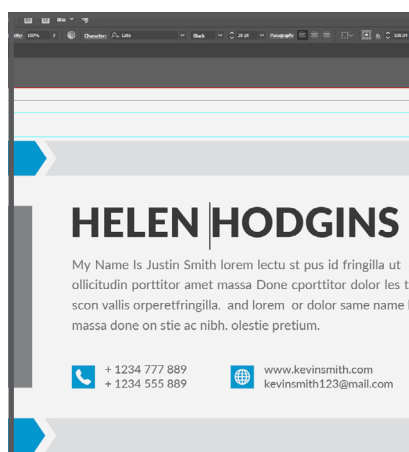

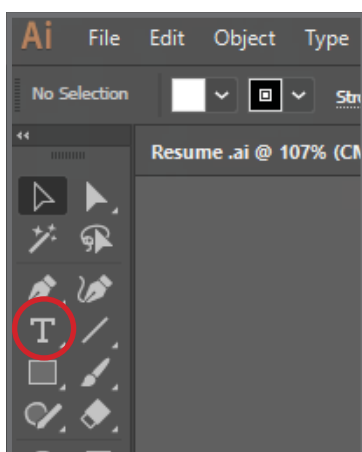

In order to **Move** an object to your desired place of the design, select the **Move Tool** first. Then select the object. You are ready to move the object now.

To select a layer, just **click** on any object in the document. You will see the layer is **selected** in the layer panel.

06. Editing Text:

Fully Editable Layers can perfectly consume your **own texts** in a blink. We always try keep it **easy and simple for editing**.

Just press **T** to select the **Type Tool**. Or simply select **Type Tool** from **Tool Panel**.

Just click on any text with the **Type Tool**.

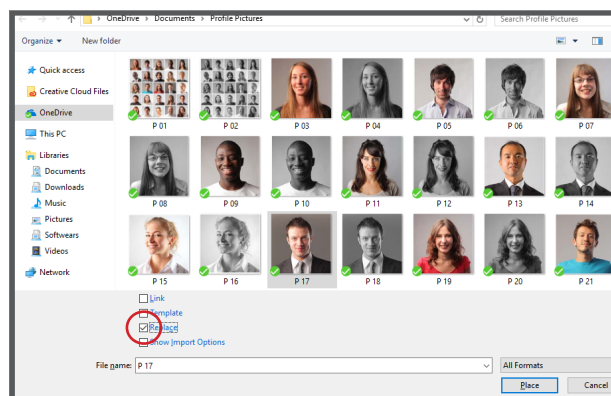

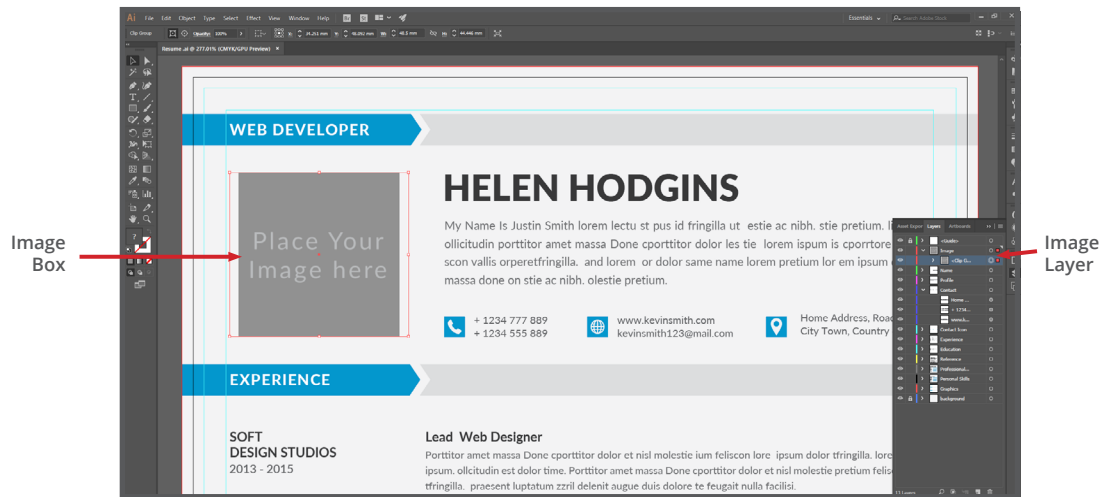

Edit as you like.

After editing Press **Ctrl+Enter** to release.

07. Changing Image or Logo:

There are various way to change the **Image or Logo** in Adobe illustrator. But we work hard to make it **Easy** for our clients to change **Image or Logo** on their purchased product. We're gonna guide you through easiest way to change image or logo.

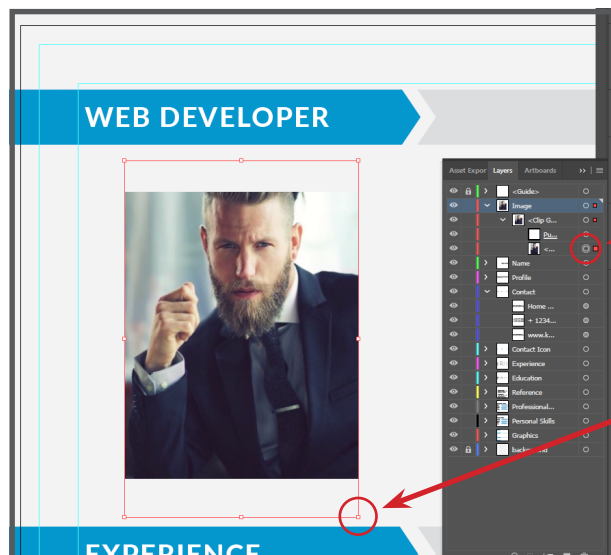

07.1. Changing Images:

Select Image box, then click **Shift+Ctrl+P**, a window will appear from where select your picture.

Before clicking Place, please unmark all except **Replace**.

Then click **Place**.

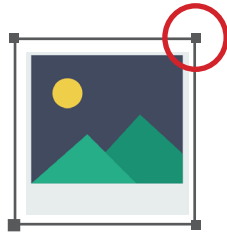

Your Image should appear like this.

If you want to **Move or Resize** your Image. Go to **Layers & Select Your Image Layer** on the marked area to move or resize.

After selecting the layer, select Move tool to move or resize your image. In this case please press shift key to maintain the aspect ratio.

07.2. Changing **Logo**:

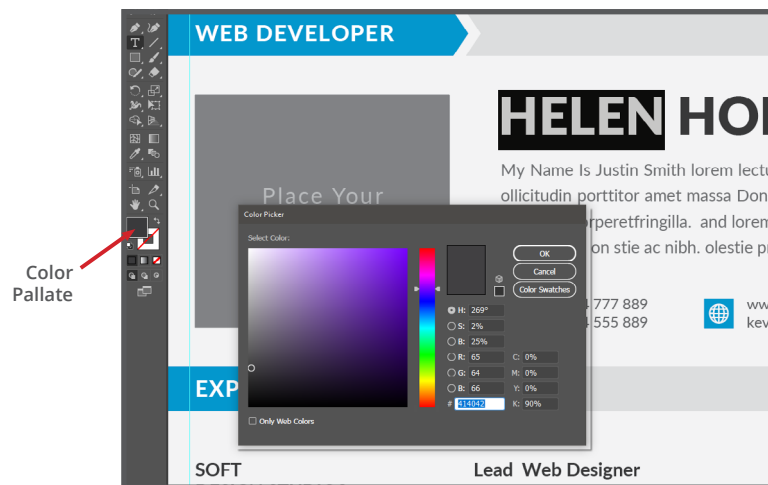

Just **Drag & Drop** your **Logo** into the Document.

You can move the **Logo** by **Move Tool** to fix the view.

Don't forget to press **Shift** key and Drag from any **Corner** of that logo to maintain aspect ratio of that image during resizing.

08. Changing Color:

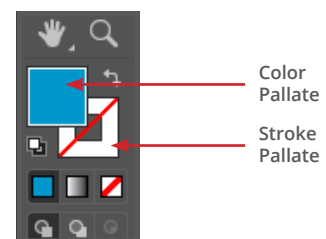

08.1. Changing **Text** Color:

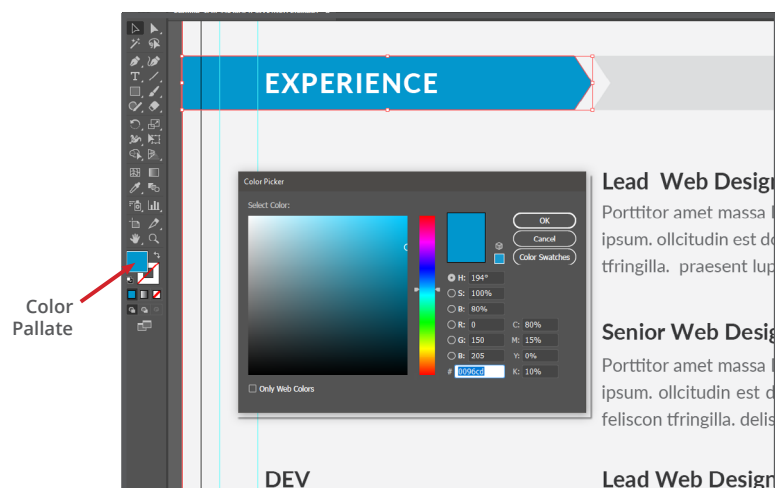

To change the color of your text, just **Select** the text with **Type tool**.

Click to bring the **Color Pallate**. Change as you like.

Double Click to bring the color pallate. Change as you like. Press **Ctrl+Enter** to release.

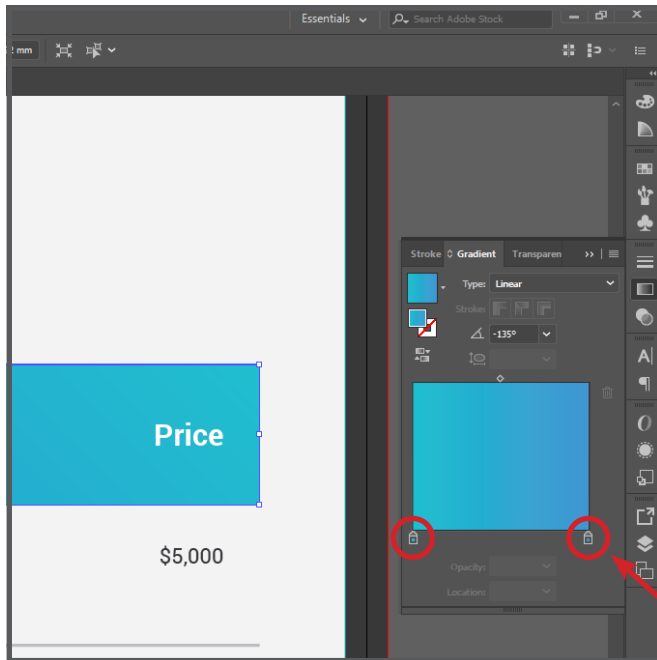

08.2. Changing the **Object** color:

Select any **Object** from your document which you need to change the color. **Double Click** to bring the **Color Pallate**. Change as you like.

09. Gradient Color change:

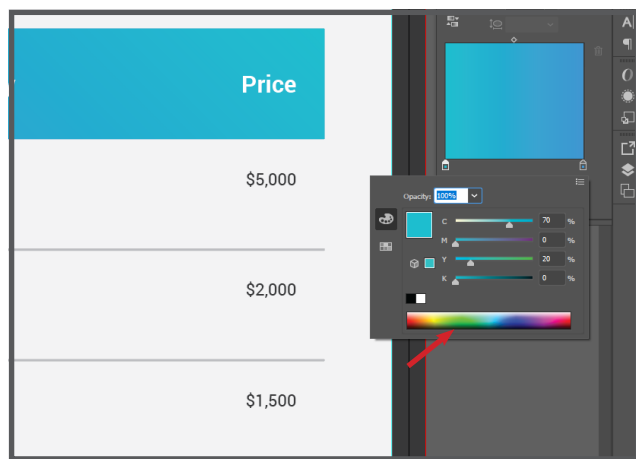

To change the **Gradient** of any shape or text, select that object with **Selection Tool**.

Now press **Ctrl+F9** to open **Gradient Options**.

After opening gradient option **Double Click** on **Marked** area to change the color.

After **Double Clicking** on the **Marked Area** colour changing options will appear.

From there you can change your color according to your wish.
