THEME DEVISERS

USING ICON

HOW TO USE THE ICONS IN THE TEMPLATE:

INDESIGN:

Simply open the file format you need based on the version of InDesign you have and copy/paste which icons you require for your document. You may need to re-size the icons, but you can use the existing ones in the template as a guide.

PHOTOSHOP:

The Social Icons folder contains a folder of PNG files, Illustrator and EPS files. Your first option is to place, drag or open then copy/paste the PNG files into the Photoshop document. This may be the simplest way for those without a copy of Illustrator or InDesign. Your other option is to open either the Illustrator, EPS or InDesign files and copy/paste into the Photoshop document, depending on which software you have. You may need to re-size the icons, but you can use the existing ones in the template as a guide.

ILLUSTRATOR:

The Social Icons folder contains a folder of PNG files, Illustrator and EPS files. Your first option is to place, drag or open then copy/paste the PNG files into the Photoshop document. This may be the simplest way for those without a copy of Illustrator or InDesign. Your other option is to open either the Illustrator, EPS or InDesign files and copy/paste into the Photoshop document, depending on which software you have. You may need to re-size the icons, but you can use the existing ones in the template as a guide.

MS WORD:

To change these icons just go to MS Word version of icons. Copy the icon which you need and then paste it to your word template. Resize it to fit in your template.
